

THE FORGOTTEN CORNERS OF NPTU

1.ATM(Auto Teller Machine)

It may sound a little unusual, but it is actually a very useful place for students because it is located near many classrooms and buildings.

For example, sometimes I need cash to buy food, drinks, or other things on campus. When students need cash, they don't need to go outside to find where the ATM is located, however, they can quickly come here and withdraw money.

4.My Favorite Spot in Minsheng Campus is the Yinghsi Lake.

At National Pingtung University, there are many geese on campus. I often see them when I walk around the school.

I like geese because they are very interesting animals. They walk slowly but sometimes chase people. Their sounds are also loud and funny.

Another reason I like geese is that they make the campus feel lively. When I see them resting near the grass or walking together, the school feels more natural and peaceful.

Because of these experiences at National Pingtung University, geese have become one of my favorite animals.

2.The pavilion standing on the lawn beside Yinghsi Lake

In this picture, we were at a pavilion standing on the lawn beside Yinghsi Lake. This is one of my favorite spots on the Minsheng Campus.

Sometimes, we can see some elders spending their time there doing leisure activities, such as chatting, singing together, or even practicing Tai Chi.

Personally, this pavilion is also a tranquil place for students to relax their bodies and minds. I like to stroll around Yinghsi Lake and sit in this pavilion when I feel bored or exhausted. While enjoying the picturesque scenery of Yinghsi Lake, I can also be cheered up by the chubby geese and ducks. Their presence adds a touch of liveliness and warmth to our monotonous school days.

Therefore, I highly recommend that you pay a visit to this place whenever you have time, even when you have nothing to do or are feeling blue.

3.The vending machines in the campus

This vending machine offers unmatched convenience through round-the-clock accessibility for students and teachers. Beyond providing drinks, it serves as a brief sanctuary for relaxation and rejuvenation amidst a busy day.

Furthermore, it acts as a vibrant social hub, fostering casual interactions and strengthening community ties within the school. It is more than a machine; it is a vital spot for both physical refreshment and social connection.
